Academic Overview

Research Interest

Comparative political economy, economic and political development, Latin American politics, causal inference, experimental methods and quantitative methods.

Dissertation

My dissertation argues that sectoral economic conflicts fostered state-building in Latin America. Using fine-grained historical case study comparisons, sectoral outputs from 1900 to the present, panel data and time-series econometric techniques, and a novel earthquake dataset (to measure state capacities), I find that industrial expansion altered the post-colonial political balance, thus putting heavy pressures for the implementation of tax institutions. In turn, fiscal expansion fostered both political development and economic growth.

Creative Writing

- [Income Taxation and State Capacities in Chile: Measuring Institutional Development Using Historical Earthquake Data](#), *under review, Studies in Comparative International Development*. Job market paper.
- [Sectoral Origins of Income Taxation: Industrial Development in Latin America and The Case of Chile \(1900-2010\)](#), *submitted*.
- [Aiming Right at You: Group v. Individual Clientelistic Targeting in Brazil](#), *under review, Journal of Politics in Latin America*.

Misc

Skills

Trained as an academic, I have considerable experience as an independent critical person, used to work under pressure, and goal-oriented. Not only I have good writing/analytical skills, but also excellent interpersonal relationships. Having both excellent leadership skills, and willingness to collaborate with others, make me an ideal candidate to take different roles, for instance in different projects, in the same institution. Finally, I have vast experience conducting data/statistical analyses, IRB applications (for my own experiments), and grant writing.

Languages

English, Spanish (native).

Software

R, Stata, L^AT_EX.
